Perennials

(CONTINUED)

PHLOXES—(Continued)

PURPLE—B. Compté.

WHITE—Mary Louise, Mrs. Jenkins, Von Lassburg, Count Zeppelin.

Phloxes and Day Lilies bloom during July and August when perennial blooms are scarce.

PYRETHRUM—Or Painted Daisies. Pink, rose and deep red.

THALICTRUM—Tall growing plants in white and rose-lavender blooms.

TRITOMAS—The new hardy class, mostly in the lighter shades; early to late blooming.

SEDUMS—Numerous varieties for rock gardens.

ROSES—For Fall 1946. Top quality, two-year Northern Ohio field-grown. Order early for rose plants—before Sept. 15 if possible. Shortages of production will still prevail this Fall.

Annuals

Annual FLOWER and VEGETABLE plants, May and June. Alyssum, Asters, Ageratum, Marigolds, Petunias, Snap-dragons, Salvia, Zinnias, Geraniums, etc.

CANNAS—Dormant roots ready during April.

RED—The President, King Humbert (bronze leaves).

YELLOW—Richard Wallace.

STRAWBERRY PLANTS will be available during April. Plant early for good results. Order as soon as possible.

You are welcome here for consultation and to see the growing plants and flowers in bloom. That is a good way to select varieties for your own planting, especially where future delivery is necessary, as with Daffodils, Tulips, Peonies, etc.

We thank you for your generous response in the past, and invite you as usual to The Libis Gardens for Bulbs, Plants and Flowers, which it is our aim to supply with products of highest quality.

Sincerely yours,

L. J. LIBIS

The Libis Gardens

ESTABLISHED 1899

Akron, Ohio, March 1946

To Our Friends and Customers:

For the season of 1946 we have a good supply of BULBS for both Spring and Fall planting; and a good supply of PLANTS, both *perennial* and *annual*. Space permits only a partial general listing:

Bulbs

GLADIOLUS—A good range of colors as follows:

WHITE—Maid of Orleans, Margaret Beaton.

PINK—Rosa Van Lima, Picardy, Colossus.

ORANGE-PINK—Betty Nuthall, Paradise.

ROSE-RED—Margaret Fulton, Smiling Maestro.

SCARLET—Beacon.

RED—Algonquin, American Commander.

DARK RED—Rewi Fallu, Black Opal.

LAVENDER—Minuet.

BLUE—Max Reger.

BLUE-VIOLET—Pelegrina.

PURPLE—Chas. Dickens, King Lear.

YELLOW—Golden Chimes, Gold Eagle, Golden Dream, Gate of Heaven.

CREAM—Betsy Bob-Up.

SMOKY—Vagabond Prince.

DAFFODILS—More than sixty of the newer developed kinds; large and medium trumpet and shallow-cupped varieties in various shades and colors.

We offer our own grown bulbs, and bulbs grown for us in Oregon. Come to see the Daffodils when blooming to select varieties for your garden.

Daffodils or Narcissus are easily grown, multiply rapidly, and bloom the first Spring after planting. All in all they are a good investment besides yielding yearly dividends of much enjoyment.

LILIES—Centifolium, Formosanum, Madonna, Regal, "Sunset," Shuksan, Umbellatum.

TULIPS—Mostly Darwin varieties imported from Holland; also bulbs of our own growing.

CROCUS—Spring flowering bulbs imported from Holland.

Perennials

CHRYSANTHEMUMS—A full color range representing the most desirable early flowering and newer kinds; large flowered varieties, cushion and pompons.

Chrysanthemums survive many frosts and continue blooming into the early snows of Fall. As a cut flower they are very long lasting. Chrysanthemum plants will be ready and available during May and June.

COLUMBINES—Long-spurred flowers, in shades of pink, rose, blue, yellow and white.

DAISIES—Vigorous, free flowering, lacinated, double and plain-petalled varieties. Large white flowers, excellent for cutting. Our own development in Daisies has proved to be very popular.

DELPHINIUMS—The Giant "Pacific" all-double strain in white; light, medium and dark blue, shades of rose-lavender and purple. The English strain, Cliveden Beauty, in bright light blue.

DICENTRA—Or old-fashioned BLEEDING HEART. Our stock consists of young vigorous plants. Will do best in soil not heavily enriched.

GYPSOPHILA—Bristol Fairy—tiny, double, white flowers.

HELIOPSIS—Scabra Incomparabilis; orange daisy-like flowers on long stems; good for cutting.

HEMEROCALLIS—Or Day Lily. Very light yellow to deep orange; blooming period mostly from late May to late August, but a few continuing until frost.

The new strain of Dr. Leonian's hybrids are in red, copper, pink, purple and maroon colors.

These we have in many varieties—blooming from late June to September.

The adaptability of the Day Lily to varying conditions of soil and climate and its freedom from insect pests makes it the most reliable perennial. See them while blooming—mid July would get the largest number at one time.

IRISES—Bearded, Siberian, Kaempferi and Dwarf. A selection of modern Irises with purer and richer colors of white, blue, red, yellow, pink and variations. This valuable perennial we have in many varieties too numerous to list here. We urge that you come to see them in bloom.

MONARDA—A very effective and showy garden plant with red flowers. A good cut flower.

MYRTLE—An evergreen trailing ground cover, having blue flowers, useful where grass will not grow.

PACHYSANDRA—A very desirable and useful evergreen ground cover.

PEONIES—Our stock is healthy and vigorous and consists of the higher-rated Peonies, both double and single, in white and beautiful shades of pink and shades of red. Orders for roots may be given during the blooming season, when satisfactory selection can be made.

PHLOXES—The following colors and varieties:

PINK—Columbia, Daily Sketch, Enchantress.

RED—Leo Schlageter, Africa.

ORANGE-RED—Chas. Curtis, Mrs. R. P. Struthers, Cheerfulness.

ROSE—Morgenrood, Augusta.

SCARLET—Brilliant.

LAVENDER—Ethel Pritchard.
